Student Goal Setting

How I will engage…	How I will interact with material…	How I will show what I know…
- I will choose a topic appropriate for the lesson. - I will work for ___ minutes and not get distracted. - I will choose a work station where I won't get distracted.	- I will choose the resource that works best for my learning. - I will adjust the digital resource to suit my learning needs.	I will use the tools in my environment appropriately to advance my learning.
- I will set a lesson specific goal every day for a week. - I will share the talking time when working in my group. - I will give specific feedback to my partner about their work. - I will choose a right sized challenge.	- I will look up words that I don't understand. - I will use the charts in my environment before asking the teacher.	- I will stretch myself and use another form of construction than the one I like the best. - I will try a new form of communication this time. - I will try it first without the teacher's help.
- I will use my personal coping strategies once today. - I will practice self reflection once this week.	- I will list everything I know about a topic before beginning a new project. - I will reflect on how my learning applies to my real life.	- I will set a goal a day for a week. - I will write out my work plan before I begin my assignment. - I will practice estimating how long an assignment or project will take me. - I will break my project down into smaller steps. - I will reflect on how my plan is working half way through.
