

LUDIA, Your AI-Powered UDL Partner

LUDIA was created as a new kind of entry point and scaffold for developing a Universal Design for Learning mindset, intentionally designing to reduce learning barriers, and discovering the power of Artificial Intelligence.

UNIVERSAL DESIGN FOR LEARNING

UNIVERSALLY ACCESSIBLE

THAT IS THE GOAL

- Free, with no paywalls
- Understands and responds in multiple languages
- Assists everyone; from novices to advanced UDL practitioners
- Accessible through touch or voice typing
- No prompting skills are needed
- Without limits!

The name “LUDIA” is a remix of the acronyms AI and UDL. Ludia means “play” in Greek. LUDIA (they/them) is non-binary; reimagining, not reinforcing, gender assumptions in the “AI helper” context.

LUDIA was created by Beth Stark, UDL Expert and Inclusionary Practices Strategist for International Schools, and Jérémie Rostan, High School Curriculum and Instruction Coordinator at International School of Panama, and author of the E-Book, “AI-Powered UDL Strategies”.
